

North Star 265 KS1

Introducing our provision...

North Star 265 is expanding its specialist SEMH provision to welcome children into a dedicated KS1 offer.

Our KS1 provision provides a safe, nurturing and structured environment where children can develop the confidence, emotional wellbeing and academic skills they need to thrive.

Building on our existing expertise in supporting children with social, emotional and mental health needs, our KS1 offer is carefully designed around the developmental needs of younger learners.

About North Star 265

At North Star 265, we understand that children need to feel safe, understood and valued before they can fully engage in learning.

Our specialist approach combines high-quality teaching with a strong focus on relationships, emotional regulation, communication and individual needs.

We work closely with children, families and professionals to understand each child and help them make meaningful progress.

Our staffing

Our KS1 pupils benefit from a dedicated team alongside specialist support from ESSA, SaLT, our PE Specialist and Behaviour Engagement Team – ensuring learning, communication, wellbeing and behaviour needs are supported.

North Star 265 KS1

Our KS1 approach

Our new KS1 classroom has been designed with younger learners in mind.

Children will experience a carefully structured day with predictable routines, purposeful learning, practical experiences and opportunities to develop independence.

We place a strong emphasis on early reading, writing, maths, communication, fine motor development and emotional wellbeing – creating the foundations for successful future learning.

Building towards the future...

North Star 265 provides short-term specialist placements designed to help children make progress and move towards their next appropriate educational pathway.

Our KS1 provision will build the academic, social, emotional and independent learning skills children need to take their next steps with confidence – whether that is a return to mainstream education or a move to another suitable specialist provision.
